

FOR IMMEDIATE RELEASE

## Bifodan Scientific Advisory Board

*Copenhagen, Denmark / Massachusetts, USA, September 7th 2016* – Bifodan, manufacturer of private label probiotic finished solutions for the nutritional industry, is proud to present its newly established Scientific Advisory Board, featuring highly esteemed profiles within the international science and development community.

*'In diligent pursuit of our corporate vision to provide innovative and scientifically based probiotic product solution, Bifodan has engaged with a group of scientific capacities'* says President and CEO, Mr. Steen Andersen. Experts in probiotic strain development, application and clinical investigation, Bifodan Scientific Advisory Board will secure that our customers get access to product solutions based on solid scientific documentation.

Professor in Microbiology at University of Stellenbosch, ZA, Dr. Leon M.T. Dicks says after a recent meeting in Denmark: *'I am honored to be part of Bifodan Scientific Advisory Board and can testify, that Bifodan connects technology and science to bring documented and viable probiotic solutions to customers around the globe'*.

Together with Assistant Professor at University of Copenhagen, Mette Keller and Dr. Gunnar Brøndstad, Neurozym Biotech in Norway, Dr. Leon Dicks will guide and challenge scientific development to support Bifodan in achieving its strategic goals for the future.

Bifodan is currently in the process of adding North American representation to the Scientific Advisory Board, to secure global alignment of our product portfolio.

Bifodan A/S develops and manufactures probiotic turnkey solutions for private label customers worldwide. Based just North of Copenhagen, Denmark, Bifodan delivers clinically documented, high quality probiotic products, manufactured at our GMP approved production facility. Bifodan has a long history in probiotic bacteria, as the company was founded by the first Danish dairy to isolate the lactobacillus acidophilus bacteria in 1938. Bifodan has been dedicated to research and development of probiotic nutritional supplements since 1992. Please visit [www.bifodan.com](http://www.bifodan.com).
